District of Columbia 18 DC ADC § 735		X				

* Many of these laws were enacted several years ago, well before products such as closed-circuit monitoring devices, dual function TV/back-up monitors, and infotainment systems became popular. Products other than televisions are probably not specifically mentioned in state laws and the description of televisions might be read broadly to include those products. The potential exists for varying interpretations by manufacturers and states of what types of products are included in phrases like “television-type receiving equipment” or interpretations of “visible to the driver while operating the motor vehicle.”
